

# CM-CPA

Fire Alarm Annunciator

ISO9001

## ■ ADVANTAGES

- Simple and cost-saving wiring. Only require 5 wires no matter how many zone circuits.
- The digital window (Volts/Info) shows the voltage of main panel and it represents various information according to error code definition.
- The zone LED indicators are synchronized with main panel. This increases efficiency to deal with the fire alarm.
- Reset button and Silence button can be functioned synchronously with main panel.
- Tiny, light and easy-to use, taking up less space than other brands.
- Built-in phone jack for communicating with main panel. It goes by wire, so it will not be interrupted by tele-signal.
